Pot-Grown Strawberries for Summer Planting

Early Strawberries

Blakemore. Large berries, bright red clear through. Firm enough for a good market berry and of delicious flavor. Superior to Premier as an early market sort.

Early Jersey Giant. Long known as "The early Strawberry without a fault." Produces an abundance of large fruit which is both attractive and of extra-high quality.

Premier. Most popular Strawberry of its season and until the introduction of Dorsett and Fairfax the best early Strawberry because of its prolific crops and attractive fruit.

Success. An old favorite with marvelous yields of fruit which is bright scarlet in color, delicious in flavor, and among the best for the home garden.

Any of the above early sorts:
\$1.00 per doz.; \$8.00 per 100.

Two New Early Strawberries of Special Merit

Dorsett. This is the recent introduction of the U. S. Department of Agriculture which is destined to lead the commercial field as an early variety. Has beautiful bright scarlet berries with a delicious wild-Strawberry flavor. Of good size, perfect quality, and sufficiently firm for distant shipping.

Fairfax. This will rule over the second-early varieties. As sweet as Dorsett but a few days later and having firmer flesh of a darker color. Produces well even during unfavorable seasons.

Either of the above two New Varieties:
\$1.50 per doz.; \$10.00 per 100.

Midseason Strawberries

Big Joe. A very profitable and popular midseason sort which gives success wherever planted. Produces very many attractive, firm berries of sweet, luscious flavor.
